

Commercial & Industrial Washers

The CL64T Tote Washer is a multipurpose machine that can wash many items ranging from totes and bins to racks full of custom parts. The CL64T conveys totes through a heated wash and rinse, followed by a fresh water rinse. An optional high pressure blow-off removes water from the product resulting in a clean, dry tote ready for use.

Standard Features

CL64T Tote Washer

- Insulated hinged double doors
- Top mounted micro-processor controls
- VFD, 3 speed selector @ 4, 5, 6 fpm
- Heated wash and rinse tanks
- Vent hoods at washers load and exit
- Stainless steel anti-clogging wash arms
- Removable Integrated pump intake screen
- Stainless steel self-draining pump and impeller
- Sloping scrap screen and deep basket

The high pressure blow off system includes a 20 hp blower supplying multiple air knives and cannons designed to target all areas of the tote and forcefully remove water to aid in the drying process.

Standard Features

CL64T Tote Washer Blow Off

- 20 hp, 3600 rpm blower
- Sound enclosure, galvanized steel with acoustical lined casing and baffle design for sound attenuation
- Distribution plenums, galvanized
- Air knives, anodized aluminum bodies with powder coated ends
- Air cannons, hard anodized with aluminum bodies
- Flexible hose connects cannons and knives to plenums with stainless steel hose clamps
- Supply duct, galvanized steel connects blower to distribution plenums
- Painted steel frame with adjustable legs to house and protect system
- Piping, 1" aluminum connected with wall, floor and crossover clamps provides adjustable system for location of knives and cannons
