2.2 billion people+ globally live with visual impairment

CREATING A BRIGHTER FUTURE

A lot can be done with nearly US$800,000. Like renovate an eye clinic, establish one, create a new operating theatre, or expand eye care education. Or, such funding can transform all these life-changing aspirations into reality.

Determined to help their neighbours, Lions of Australia, in partnership with Brien Holden Vision Institute, built on progress spurred five years ago in Papua New Guinea, home of alarmingly high rates of vision impairment – especially among those living below the poverty level and lacking access to basic services.

A portion of the grant helped expand vision services at Lions National Resource Center for Eye Health (NRC), near Port Moresby General Hospital’s Eye Clinic. Funding also renovated the hospital’s eye clinic, while adding a new operating room, and also helped establish a pediatric clinic. Said Past District Governor Gary Kenny, “It was time for Lions NRC to serve children and treat broader vision issues, and the Eye Clinic needed resources to address quality and hygiene challenges.”

Funding also facilitated further education for nearly 20 ophthalmologists and rehab specialists. “Education is integral to Lions’ long-term, holistic approach to saving sight,” said Kenny. “LCIF helps make this possible worldwide.”
Seeing Things Clearly

Vision has been at the forefront of Lions service for more than a century. Though tremendous strides have been made, work must continue, as statistically, vision-related issues look like this in this part of the world:

1 in 20 Australians aged 50+ has moderate to severe vision impairment

≤35% of Australians with diabetes have diabetic retinopathy

Vision disorders cost Australia ~$9.85B

THAT’S HERE. GLOBALLY, VISION CHALLENGES LOOK LIKE THIS:

1 billion people live with vision impairment that could have been prevented or can be corrected

US$14.3 billion is needed to treat existing cases of refractive error and cataracts worldwide

Unaddressed distance vision impairment in many low- and middle-income regions is 4 times higher than in high-income regions

LCIF AND LIONS

Funding Service, Delivering Solutions

More than US$365 million in LCIF SightFirst grants have helped Lions show the world a brighter tomorrow. We will continue to be part of the solution, adding to this progress:

Visit lcif.org/vision to learn more and access information about LCIF’s SightFirst, Matching, and District and Club Community Impact grants.

Visit lionsclubs.org/donate to support LCIF’s global vision and health programs.

LCIF is the grant-making body empowering Lions to create greater impact in their communities and around the world. The vast majority of funding LCIF receives is from Lions; one hundred percent of every donation supports Lions service through LCIF grants and programs. Vision is just one cause area supported by LCIF and Campaign 100: LCIF Empowering Service. With financial support from Lions and clubs worldwide, Campaign 100 is empowering Lions to increase service impact in vision, youth, disaster relief, and humanitarian efforts; fight the global epidemic of diabetes; and make important progress in expanded cause areas of childhood cancer, hunger, and the environment.
