STANDARD FEATURES
- 202 racks per hour
- Opti-RinSe™ system
- Rapid return conveyor drive mechanism
- Insulated hinged double doors with door interlock switches
- 19.5 inch chamber height opening
- Top mounted micro-processor control module
- Energy saver mode
- Dirty water indicator
- Manager activated low temperature alert
- NSF rated configurable Pot and Pan dwell mode
- Configurable “intelligent” smart delime alert, determined by water hardness test at installation
- Service diagnostics
- NAFEM Data Protocol compliant
- Computational fluid dynamic designed self-aligning wash manifolds
- Stainless steel debossed anti-clogging wash arms
- Removable integrated pump intake screen
- Stainless steel self-draining pump and impeller
- Single, sloping scrap screen and deep basket
- Stainless panels enclose perimeter and bottom
- Door actuated drain closure
- Single point electrical connection (three phase only), does not include the booster heater
- Convertible hot water or low temp final rinse
- Vent fan and booster heater control

DIRECTION OF OPERATION
- Right to Left
- Left to Right

VOLTAGE
- 208/60/1
- 240/60/1
- 380/60/3
- 208/60/3
- 240/60/3
- 480/60/3
- 600/60/3

MODEL
- CL44eN-BAS – Dishwasher

OPTIONS AT EXTRA COST
- Stainless steel pressure-less 15/30 KW booster heater
- Higher than standard chamber

ACCESSORIES
- Stainless steel vent hoods
- Direct drive unloader
- Side loader
- Blower-dryer
- Drain water tempering kit (Drain water tempering kit comes standard on the DWER or advanced models)
- Flanged feet kit (requires two kits)

Specifications, Details and Dimensions on Inside and Back.
THE CLéN WAREWASHER IS NOW STANDARD WITH MORE EFFICIENT FEATURES THAN EVER . . .

Inside and out the CLéN warewashers by Hobart are packed with standard components and patented design innovations that make them the biggest value in the dishwasher industry.

The insulated hinged inspection doors provide easy access in the chamber. Exterior wash pipes and reduced interior baffles reduce clean-up time. The Rapid Return drive allows for a wide separation between the wash and the rinse zone.

Wash Manifolds. Computational Fluid Dynamic designed wash manifolds are self-aligning and come with Hobart’s signature debossed anti-clogging nozzles for superior result.

Opti-RinSe™. Hobart’s exclusive Opti-RinSe™ significantly reduces operating cost by reducing rinse water and the energy required to heat the water. The unique spray pattern uses large droplets to more efficiently sanitize the ware.

OTHER STANDARD FEATURES . . .

- **Thermal Layer Curtains** help keep the heat inside the machine.
- **Ball Detent Clutch Conveyor Drive** for maximum protection against conveyor jams
- **Integrated Removable Pump Intake Screen** to offer the ultimate guard of keeping debris from entering the pump.
- **Hinged Door Seals** and stainless steel labyrinth seal for drip-free operation
- **Low-Temp Convertibility In Field.** All machines shipped hot. Change software in field at setup to low temperature if desired – then, if requirements change, convert from one mode to the other in the field. An exclusive feature – standard from Hobart.
- **Door Actuated Drain Closure.** Closing the door automatically actuates drain closure, eliminates extra manual steps, ensures that closure is in the correct position.

New, Improved Control Module. The Hobart exclusive microprocessor control module offers a choice of many features, such as an exclusive Energy Saver Mode, NSF rated configurable Pot and Pan dwell mode, Low Temperature Alerts and Dirty Water Indicator. It also displays pertinent machine status and has a configurable “intelligent” delime notification. The controls have built-in Service Diagnostics and are NAFEM Data Protocol Compliant.

Soil Management System. Screen design sheds soil more easily than flat screens, reduces frequency of cleaning — easy to empty large soil particles . . . Just lift out the scrap basket.
AVAILABLE OPTIONS AND ACCESSORIES . . .

Flexibility is synonymous with Hobart CLé dishwashers. If your operation demands a dishwasher with a vent hood, an extended hood . . . a power scrapper, just specify the combination of options that suit your needs.

Built-in Pressureless Stainless Steel Booster Heater. Interwired and interplumbed. Saves on installation and saves floor space. Simplifies operation with just one switch to power dishmachine and booster.

Side Loader. Save up to 20 square feet in the dishroom layout with an optional C-Line Side Loader. Racks are indexed 90° into the dishwasher automatically – a feature that cuts space and reduces labor dramatically. Your dishroom team will appreciate this feature.

OTHER AVAILABLE ACCESSORIES . . .

Blower-dryer, steam booster heater, and a single-point electrical connection to include electric booster heater.
**CL44eN-BAS DISHWASHER**

**Boosting Heat 15kW**

3 PHASE SEPARATE ELECTRIC CONNECTION

E4 ELECTRIC CONNECTION: MOTORS AND CONTROLS
1-1/4" CONDUIT. 63-3/4" AFF.
E5 ELECTRIC HEAT: 15,000 WATTS, WASH TANK. 1" CONDUIT HOLE, 63-3/4" AFF.

PLUMBING CONNECTIONS

CONNECTION INFORMATION
(NAV = ABOVE FINISHED FLOOR)

LEGEND

ELECTRIC, STEAM, AND GAS HEATS

P1 DRAIN: 2" FPT, 7-3/8" AFF TWO POSSIBLE CONNECTIONS; MAY BE DRAINED TO EITHER SIDE OF VALVE, PLUG OPPOSITE SIDE.
P2 SANITIZER FEEDER: REMOVE 1/8" NPT PIPE PLUG TO ACCESS TAPPED HOLE. 1/8" NPT 59-1/2" AFF (LOW TEMP ONLY)
P3 RINSE FEEDER: REMOVE 1/8" NPT PIPE PLUG TO ACCESS TAPPED HOLE. 1/8" NPT 59-9/16" AFF.
P4 DETERGENT PROBE SENSOR: REMOVE CAP AND STUD ASSEMBLY TO ACCESS 7/8" DIA HOLE (WASH TANK ONLY). 14-5/8" AFF.
P5 INDIRECT DRAIN-FLOOR SINK: BY OTHERS, 0" AFF. WHEN REQUIRED, INSTALL FLOOR SINK OUTSIDE THE PERIMETER OF THE DISHWASHER.
P6 COMMON WATER CONNECTION: 1/2" FPT, HIGH TEMP. W/O BOOSTER 180° F MIN. 194° F MAX. LOW TEMP. 120° F MIN.
P7 COMMON WATER CONNECTION: 1/2" FPT, HIGH TEMP. W/15K BOOSTER 140° F MIN. HIGH TEMP. W/30K BOOSTER 110° F MIN.

OPTIONAL DRAIN WATER TEMPERING

P12 COLD WATER CONNECTION: 1/2" FPT, COLD TEMP 80° F MAX 7-3/8° AFF.
**MISCELLANEOUS NOTES:**

Optional vent hoods or extended hoods exhaust requirements: 200 CFM entrance end 400 CFM exit end. All dimensions taken from floor line may be increased approximately 3/4" or decreased 1/2". 44" inside tank (at table connection) 43-25/32" table to table. Net weight of machine: 501 lbs (std height), domestic shipping weight: 576 lbs (std height). CL44eN-LATENT AND SENSIBLE HEAT DISSIPATION INFORMATION ON F40459.

**PLUMBING NOTES:**

**ELECTRIC, STEAM, AND GAS HEATS**

Water hammer arrestor (meeting ASSE-1010 standard or equivalent) to be supplied (by others) in common water supply line at service connection. Recommended water hardness to be 3 grains or less for best results. For non-booster machine (P6 conn): recommended building flowing water pressure to the dishwasher is 20 PSI. (15 PSI min - 25 PSI max). If pressures higher than 25 PSI are present, a pressure regulating valve with internal thermal expansion by-pass must be supplied (by others) in the water line to the dishwasher. For convenience when cleaning, water tap should be installed near machine with heavy duty hose and squeeze valve. When used, chemical sanitizing feeder must be certified to NSF standard 29.

**GAS HEAT ONLY**

For natural gas, pressure to the burner (customer connection) should be 3.5" min, 7" max W.C. For LP gas, pressure to the burner (customer connection) should be 8" min, 11" max W.C. If gas pressure is higher than 7" (nat) OR 11" (LP) W.C., a pressure regulating valve must be installed (by others) in the gas line to the dishwasher. Gas heat (natural or LP) BTU/HR input - 78,000. Gas exhaust venting must be installed according to local code. Do not connect flue to power vent. See installation manual for gas venting.

P7 COMMON WATER CONNECTION: 1/2" FPT.
HIGH TEMP. W/15K BOOSTER 140°F MIN.
HIGH TEMP. W/30K BOOSTER 110°F MIN.

STEAM HEAT ONLY

P8 STEAM COILS: 10 TO 50 PSI FLOWING, 3/4" FPT, 11-3/16" AFF.
**Specifications:** Meets requirements of ASSE Standard No. 1004.

**Design:** Semi-automatic, high or low temperature single-tank, rack-type dishwasher with flexible thermal layer curtains at the ends of chamber and between wash and final rinse zones. Insulated hinged inspection doors located in front of machine provide easy access to wash arms, rinse arms, strainer, strainer basket, and pump intake screen. Length of machine inside tank (at table connection) 44 3⁄4". Machine designed to clean and sanitize with hot water 160°F wash and 180°F (minimum) final rinse, or low temperature 130°F wash and 120°F final rinse and a chemical sanitizer. Water hardness recommended to be 3 gr. or less for best results. Automatic interlocks shut off pump and conveyor if door is opened when machine is in operation.

**Construction:** Tank, chamber, frame, legs, control box, doors, and all panels are constructed of stainless steel.

**Pump:** The 165 gpm recirculating stainless steel pump and impeller with a ceramic seal seat. Easily accessible pump assembly permits quick inspection. The pump is self-draining. All piping distributing water to the upper and lower wash arms is stainless steel tubing.

**Pump Motor:** Built for Hobart 2 hp grease-packed ball bearings, splash proof, ventilated with manual, resettable inherent overload protection. Available in electrical specifications of 208-240/60/3, 208-240/60/2, 480/60/3 and 600/60/3. Also available, but not submitted for UL listing are 200-240/50/3 and 380-415/50/3.

**Controls:** A stainless steel control module with power and “start/stop” buttons is mounted on top of the machine. Machine control circuitry will be operated from a 120-volt control circuit transformer. Electrical components are completely wired with 105°C, 600V thermoplastic insulated wire with stranded conductors routed through UL listed electrical conduit or covered wire way.

**Conveyor:** Rapid Return device, designed for more even throughput of racks and allows for a 16-inch separation between the wash and the rinse zone. Racks conveyed automatically through wash and rinse zones and onto clean dish table. Ball Detent Clutch drive prevents damage to machine or racks, should movement of racks be obstructed. Rack tracks, conveyor structure, and drive units of stainless steel for 19 3⁄4" x 19 3⁄4" racks as standard. Conveyor speed: 5.6 FPM.

**Drive Motor:** Built for Hobart, ¼ horsepower gear motor, ventilated with manual, resettable inherent overload protection. Available in electrical specifications of 208-240/60/1, 208-240/60/3, 480/60/3 and 600/60/3. Also available, but not submitted for UL listing are 200-240/50/3 and 380-415/50/3.

**Power Wash:** Wash tank is equipped with upper and lower stainless steel CFD Wash Arms which effectively direct water jets to all ware surfaces. Both upper and lower wash arms are self-aligning and have easily removable end caps for cleaning without use of tools. A removable perforated stainless steel strainer pan supports a deep perforated stainless steel basket.

**Final Rinse:** Final rinse flow rate: 2.1 gpm, .62 gpr, 126-gph. Stainless steel upper and lower Auto Position Rinse Arms have single rows of nozzles. Racks entering the rinse zone automatically trigger rinse. Final rinse water line is equipped with a vacuum breaker downstream of an electrically operated solenoid valve in common piping system. Rinse agent and Low Temp Final Rinse – Sanitizer agent (9.25% sodium hypochlorite – bleach) dispenser injection ports provided in final rinse piping above chamber. Caution: Certain materials, including silver, aluminum, and pewter are attacked by sodium hypochlorite (bleach) in the chemical sanitizing dishwasher mode of operation.

**Fill:** Fill water line is equipped with vacuum breaker on downstream side of electrically operated solenoid valve in common piping system, for automatic maintenance of tank level.

**Drain and Overflow:** Large bell-type automatic overflow and drain valve controlled from inside of machine. Drain automatically seats by closing inspection doors. Drain seal is large diameter, high temperature o-ring. Drain housing can be plumbed from load or unload end of machine.

**Wash Tank Heating Selections (must choose one):**

**Electric:** One electric Incoloy® sheathed immersion heater (15 KW) removable from inside tank. Tank water temperature is controlled by microprocessor controlled thermostat with positive low-water protection and magnetic contactor. (Disconnect switches not furnished.) A high limit device mounted on the surface of the tank additionally protects heating element.

**Steam:** One-inch stainless steel steam coil. Tank water temperature controlled by microprocessor controlled thermostat with positive low-water protection. Steam supplied to machine through high temperature steam solenoid valve and line strainer.

**Gas:** Regulated infrared immersion tube gas burner system. Microprocessor controlled thermostat and a blower with a pressure switch control tank water temperature. Positive low water protection is provided. A high limit device mounted on the surface of the tube additionally protects immersion tube. A solid-state igniter board controls the gas valve and provides flame ignition. A transformer steps the control circuit voltage down from 120 volts to 24 volts to power the igniter board and gas valve. For natural gas, gas pressure to burner (customer connection) not to exceed 7" W.C. For LP gas, gas pressure to burner (customer connection) not to exceed 11" W.C. If gas pressure is higher than 7" W.C. natural or 11" W.C. LP pressure regulating valve must be supplied (by others) in the gas line to the dishwasher.

**Optional Equipment at Extra Cost:**

Stainless steel pressureless booster heater. Stainless steel vent hoods with vent stack and locking-type damper. Higher than standard chamber. Side loaders and unloaders. Floor mounted steam booster. 19 3⁄4" x 19 3⁄4" peg, combination and miscellaneous racks. Table limit switch. Drain water tempering kit.
