

HOBART

LOOK WHAT YOU COULD BE SAVING! THE NEW AM16

IS PACKED FULL OF TECHNOLOGIES THAT
LOWER THE COST OF OPERATIONS AND
SAVE RESOURCES AND MONEY!

15% ENERGY SAVINGS Ventless Energy Recovery

Captures heat energy out of steam into incoming cold water to reduce energy use in the booster.

50% LESS WASH WATER CHANGES Automatic Soil Removal

Removes up to 80% of food soil during the wash cycle to keep wash water cleaner, longer, with fewer tank fills per day.

80% LESS DEMAND Cold Water Line Feed

Reduce the demand and pressure on your facility water heater and the need for hot water supply to the machine.

\$3,500 SAVING ON INSTALLATION Ventless Energy Recovery

Eliminate the vent hood and save on purchase and installation.

40% LESS HEAT LOST 5 Sided Hood

The fully enclosed design traps heat, reducing the idle energy needed to maintain wash water temperature.

20% LESS LABOR TIME Automatic Soil Removal

Reduces pre-scraping labor time up to 20%, so staff spend less time washing dishes and more time on other tasks.

90% LESS WATER Drain Water Energy Recovery

Lowers drain water temperature below 140° by transferring heat from drain water to incoming cold water. This reduces energy use in the booster, and eliminates the need for a drain water tempering kit.
