Plumbing Notes: Water hammer arrestor (meeting ASSE-1010 standard or equivalent) in common water supply line at service connection.

Recommended water hardness to be 3 grains or less for best results.

Recommended building flowing water pressure to the dishwasher is 15-25 PSI. If pressures higher than 25 PSI are present, a pressure regulating valve with internal thermal expansion bypass must be supplied (by others) in the water line to the dishwasher.

For convenience when cleaning, water tap should be installed near machine with heavy duty hose and squeeze valve.
