CONSTRUCTION, HARDWARE, INSULATION

Cabinet exterior front, sides, pan cover lid and doors are constructed of stainless steel. Cabinet interior and door liners are constructed of anodized aluminum. The exterior cabinet back at the bottom are constructed of galvanized steel.

Doors self close at less than 90 degrees and also includes a stay open feature at 105 degrees. Gasket profile and Santoprene® material simplify cleaning and increase overall gasket life.

Both the cabinet and doors are insulated with an average of 2" thick high density non-CFC, foamed in place polyurthane.

A 3/4" thick, full-length, reversible white nylon cutting board is supplied standard.

PANS & COVER

Each model is supplied standard with its full compliment of 4" deep plastic 1/6 size pans and stainless steel pan dividers. The pan cover and lid are constructed of stainless steel, and is easily removable for cleaning.

REFRIGERATION SYSTEM

A balanced, rear mounted, front breathing, self-contained refrigeration system using environmentally friendly, non-flammable R-450A refrigerant is provided. It features a capillary tube metering device, air cooled hermetic compressor, a forced air evaporator coil and a non-electric condensate evaporator. An 8' cord and plug is provided. Standard operating temperature of the refrigerated base is 34° to 38°F (1.1° to 3.3°C).

INTERIOR

Standard interior arrangements include two (2) powder coated wire shelves per door, mounted on pilasters. These are adjustable in 1/2" (1.27 cm) increments, allowing for a minimum of 1-1/2" (3.81 cm) spacing between shelves.

WARRANTY

Both a three year parts and labor warranty and a five year compressor parts warranty (self-contained models) are provided standard.

NOTES:

- Overall depth figure includes standard cutting board.
 - MDEC = Maximum Daily Energy Consumption
 - Based on a 90 degree F ambient and 20 degree F evaporator
- When ordering please specify: Voltage, Hinging, Optional Accessories and any additional warranties.
 - This unit may be manufactured in other electrical characteristics and may have additional regulatory agency approvals. Consult factory for other electrical characteristics and agency approvals based on specific electrical and country requirements.
